ATM RAMINATOR APPOINTS SECURITY CENTRE DALLAS

USA distributor for ATM Raminator has finally been appointed.

Richard Gould CPP, Director of Lockit Systems (Aust) and inventor of the multi award winning ATM Raminator says “It was a great result to appoint The Security Centre Dallas as we had found a company whose security and management values reflected our own. The Security Centre’s core of experienced security industry staff is an essential element of the ATM Raminator distribution team.”

The Security Centre, headquartered in Dallas, Texas, is a family-owned ‘banking oriented security supplier’ with a long and well established reputation for nationally distributed electronic and security products which genuinely raise the security standards of Banks and Credit Unions.

Being active and contributing members of the FSPA (Financial and Security Products Association) and ATMIA (ATM Industry Association), and backed by 46 years in banking & financial services, makes Security Centre Dallas and ATM Raminator a perfect fit.

“In just 3 months we have begun to send ATM Raminators into the USA and we are seeing stream of USA-supported dealers starting to make sales of ATM Raminator.”

The New York Bankers Association and Texas Bankers Association immediately endorsed the ATM Raminator, and insurers of ATMs are now offering discounts on insurance for fitting ATM Raminator.

The beauty of ATM Raminator, says Gould is that: “It’s a once off purchase which delivers many years of security, is cheaper than many alternatives, directly saves both property repair costs and ATM cash and replacement, has no electronics or moving parts and is 100% recyclable at end of life. “

ATM Raminator has retained every ATM attacked with our system fitted and ‘Smash & Grab’ in Australia has dropped by 95% since it was introduced, Thieves have given up stealing ATM’s because of ATM Raminator.” says Gould.
